

Circular Economy

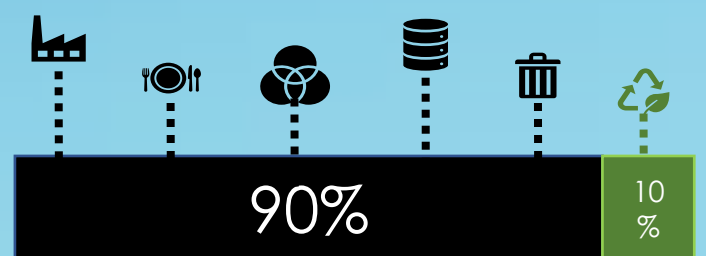

Plastic Waste is a Global Issue

Strong, lightweight, and moldable, plastics are used in thousands of products that add comfort, convenience, and safety to our everyday lives.

Reduce • Recycle • Reuse

ONLY 10%

More than 90% of plastics are thrown away.

Ban the Bans • No New Taxes

Banning or taxing waste to reduce landfilling is 'forced' and unsustainable behavior change.

Shift from Linear to Circular

Linear or Reuse Economy

After products and materials are 'used' they are thrown away.

Circular Economy

Products and materials are maintained in the economy for as long as possible.

Public Sentiment

Sustainability

Public sentiment on climate change is having significant and lasting influence on shareholder investment!

One World Clean Energy: Innovation

Processing unsorted plastics waste mixed with sewer water to produce electricity.

Renewable Energy
ZERO Waste
ZERO Odor
near ZERO emissions

Eliminating Landfills

Source Location
Processing

97% reduction of waste volume.
The resulting 3%, biochar, is
valuable fertilizer additive used
in greenhouses.

Modular /Scalable
Sized to meet project
specific volume

Drop IN Process
Grid Connected Electricity

Mixed Feedstock
Processing Unsorted Plastics

Our mission: Execute technologies to improve our waters, reduce fossil fuel use and pollution, and eliminate waste.
